

# CAT BOWL

Optimised food bowls for cats

**DENK**

## Cat Bowl *Granicium*®

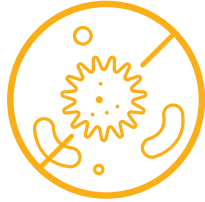

Together with experts and cat lovers, we have developed a bowl that is adapted to the anatomical features of cats. Unlike dogs, cats have a rounder head and sensitive whiskers. That's why our cat bowl is flatter with the same diameter. The slow feeder insert is also adapted to cat food. Not only are our food bowls beautiful, they also offer a variety of special features.

You can't give your cat more pleasure.

Allergy-friendly

Antibacterial

Microwave safe

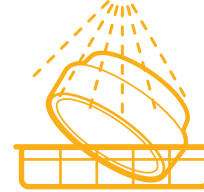

Non-slip

Food-tested

Stackable

Dishwasher safe

With Food Stop

Tilt-proof

Ergonomic

Optimized for whiskers

15-Year Warranty

## **Tilt-proof and stable**

The bowls are purposely made heavy and robust. The centre of gravity of the mould and the highest material thickness are in the wide centre area. As a result, the contact point is very stable on impact. The low centre of gravity also makes our food bowls particularly resistant to tipping over.

## **Optimized for head and whiskers**

Cats have sensitive whiskers that ideally should not touch the bowl when eating. At the same time, cats have round heads. Therefore, our cat bowls are flatter than comparable dog bowls.

## **Stackable**

The bowls can be stacked. This allows uneaten food to be covered; e.g., with a water bowl, or the food height to be adjusted for large cats.

## **Oven safe / microwave safe**

For hot food, the bowls can be heated in a convection oven or a microwave. Granicium has a very high heat storage capacity, about 20 times longer than steel.

## **Food stays in the bowl**

The inner walls of the bowls rise continuously and do not form an edge. This let the cat push the food up with its tongue without it getting stuck in a corner. The food can hardly fall out. The textured ceramic prevents food from slipping out of the bowl and lets the cat clean its tongue.

## **Easy to clean and 15-year warranty**

The bowls can be cleaned in the dishwasher or by hand with dish soap. We provide a 15-year material guarantee on the durability of the ceramics. Quality – Handmade in Germany.

# Granicism®

The Granicism granite ceramics we have developed are food-grade and contain no metals or plasticizers. There are no known allergy reactions.

In order to achieve the finest possible surface structures, we add effective microorganisms (EM) during production. In this way, the ceramic mass „ferments“ and we achieve a gentle roughness of the surface.

In addition, we mix rutile into the ceramic and make use of a photocatalytic effect. As a result, bacteria and viruses are destroyed naturally. Odour formation is also reduced, e.g. when food is left standing for a longer period of time.

Robust & durable

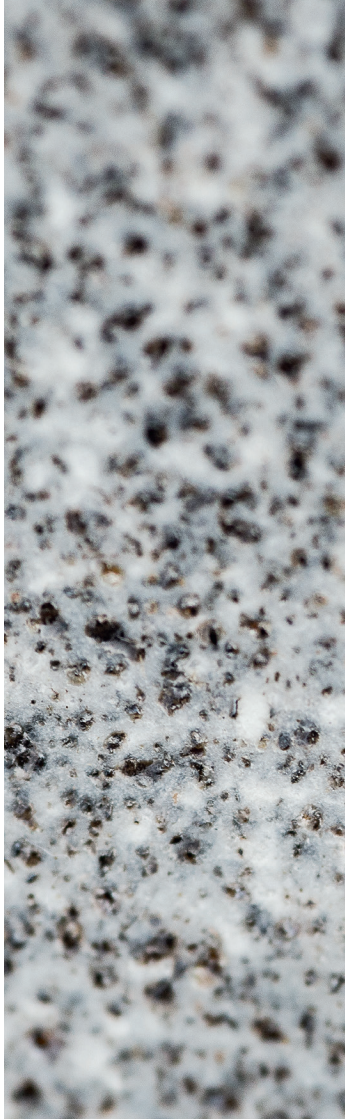

Food-safe & neutral in taste

Waterproof

Heat-retaining

## Cat Bowl *Granicism*

Art.-No. KGR

H 4,3 cm | Ø 16 cm | 350 ml | 700 g

## Slow Feeder Insert

We offer an appropriate slow feeder insert adapted for cat food. The insert consists of a plate with raised relief shapes that is placed loosely in the bowl. This slows the cat down when eating and helps prevent eating too quickly.

Art.-No. KASGR | H 1,3cm | Ø 11 cm | 165g

## Cover

Each bowl can be covered with a matching lid. This is helpful for odour-free storage of uneaten food or when heating in the microwave or oven.

Art.-No. KDGR | H 1,3cm | Ø 16 cm | 350g

## Minka's Tiled Stove *The electrically heated cat bed*

Well-being due to thermal radiation made of solid ceramics

- Made of special heat-storing ceramics
- Soothing deep heat for the cat
- For indoor and outdoor use
- Durable, self-regulating, electric heating element
- Electricity costs only about 5 cents per day
- TÜV tested, CE certified
- Handmade in Germany

MK-CN | L 33 cm | B 44 cm | H 7 cm | 6,10kg
