

AROUND

Feeder & Bird Bath

DENK

Around Granicium®

Around is designed to serve as both a bird feeder and a hanging birdbath. This keeps birds safe from cats and allows bird lovers to observe them more easily. When used as a birdbath, the ceramic bowl is closed. When used as a bird feeder, the bowl has two drainage holes.

Around was developed in collaboration with Italian designer and bird expert Luca Galmarini.

The ceramic bowl is made of *CeraNatur*® and coated with *Granicium*®. The rough surface provides a secure grip for birds and insects. The high-quality ceramic is frost-proof, UV-resistant, and seawater-resistant. We offer a 15-year warranty on weather resistance.

Assembly

The steel parts are made of heavy-duty, stainless steel. Assembly is very simple and requires no tools.

The roof is placed on the ring and secured with the screw sleeve. The bracket is then screwed into the top of the sleeve. Next, the ceramic bowl is hung inside the ring. The built-in groove fits precisely into the radius and secures the ceramic.

Please retighten the screws every two months. The structure is very stable and storm-proof. If the hanging height is insufficient, you can adjust it using a chain or a rope.

Cleaning

To protect against pathogens, the ceramic bowl must be cleaned regularly, preferably every two days. To do this, remove the bowl from the ring and clean it with water and a brush. If it is heavily soiled, natural vinegar cleaner can also be used for disinfection. Afterward, hang the bowl back in place and fill it with water or food.

Bird Waterers in Winter

Birds need water regularly, especially in winter. That's why it makes sense to keep the bird waterer running year-round. If the water freezes, the ice won't damage the ceramic bowl. During prolonged periods of frost, the ceramic bowl should be filled regularly with warm water. This ensures that birds have access to water even in very cold weather.

Summer Feeding

Due to the often limited food supply, experts now recommend providing birds with appropriate food even in the summer. Suitable food is available at pet stores or through nature conservation organizations.

Accessories

We also offer *Around* as a set with two bowls—one for feeding and one as a birdbath. This way, birds can be provided with water in the spring and summer, and in the fall and winter, the bowl is swapped out and *Around* becomes a feeder. The respective bowls can also be purchased separately.
