

# Dog Bowls

Optimised food bowls for all dog breeds

## Dog Bowl *Granicium*®

Together with experts and dog lovers, we have developed a series of bowls that ideally meets the needs of dogs. Not only are our food bowls beautiful, they also offer a variety of special features.

You can't give your dog more pleasure.

Allergy-friendly

Antibacterial

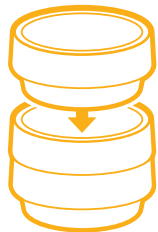

Microwave safe

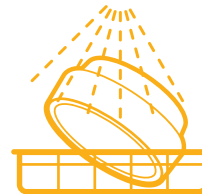

Non-slip

Food-tested

Stackable

Dishwasher safe

With Food Stop

Tilt-proof

Ergonomic

Keeps ears clear

15-Year Warranty

## **Tilt-proof and stable**

The bowls are purposely made heavy and robust. The centre of gravity of the mould and the highest material thickness are in the wide centre area. As a result, the contact point is very stable on impact. The low centre of gravity also makes our food bowls particularly resistant to tipping over.

## **Ears don't droop into the food**

The bowls are tapered to become narrower towards the top edge. This guides the ears over the edge when eating and keeps them from falling into the food.

## **Stackable**

The bowls can be stacked. This allows uneaten food to be covered; e.g., with a water bowl, or the food height to be adjusted for large dogs.

## **Oven safe / microwave safe**

For hot food, the bowls can be heated in a convection oven or a microwave. Granicium has a very high heat storage capacity, about 20 times longer than steel.

## **Food stays in the bowl**

The inner walls of the bowls rise continuously and do not form an edge. This lets the dog push the food up with its tongue without it getting stuck in a corner. The food can hardly fall out. The textured ceramic prevents food from slipping out of the bowl and lets the dog clean its tongue.

## **Adapted to the shape of the head**

The bowls are adapted to the anatomical shape of the respective dog's head. Dogs with short snouts (e.g. Bulldogs) use the flatter version; dogs with long snouts (e.g. Labradors) use the deeper version. A smaller bowl is available for small dogs (e.g. Dachshunds).

## **Easy to clean and 15-year warranty**

The bowls can be cleaned in the dishwasher or by hand with dish soap. We provide a 15-year material guarantee on the durability of the ceramics. Quality – Handmade in Germany.

# Granicium®

The Granicium granite ceramics we have developed are food-grade and contain no metals or plasticizers. There are no known allergy reactions.

In order to achieve the finest possible surface structures, we add effective microorganisms (EM) during production. In this way, the ceramic mass „ferments“ and we achieve a gentle roughness of the surface.

In addition, we mix rutile into the ceramic and make use of a photocatalytic effect. As a result, bacteria and viruses are destroyed naturally. Odour formation is also reduced, e.g. when food is left standing for a longer period of time.

Robust &  
durable

Food-safe &  
neutral in taste

Waterproof

Heat-retaining

## **Dog Bowl L Granicum**

for medium to large dogs with a long snout

Art.-Nr. HLGR

H 10,5cm | Ø 23cm | 2,1L | 2,8kg

**Slow Feeder Insert**  
for Dog Bowl L

Art.-No. HASMGR | H 2,2 cm | Ø 16,5 cm | 475 g

**Slow Feeder Insert**  
for Dog Bowl S

Art.-No. HASSGR | H 2,6 cm | Ø 12 cm | 270 g

**Cover**  
for Dog Bowl L & M

Art.-No. HDLGR | H 1,9 cm | Ø 22,5 cm | 750 g

**Cover**  
for Dog Bowl S

Art.-No. HDSGR | H 1,3 cm | Ø 16 cm | 350 g

## Slow Feeder Insert

We offer a slow feeder insert for bowl sizes M & L, as well as for bowl size S. The insert consists of a plate with deep nubs that is placed loosely in the bowl. This slows the dog down when eating and helps prevent eating too quickly.

## Cover

Each bowl can be covered with a matching lid. This is helpful for odour-free storage of uneaten food or when heating in the microwave or oven.

## Stand

For larger dogs, a stackable stand made of waterproof birch plywood is available for bowl sizes M & L. The stand elevates bowl L by 10 cm and bowl M by 12.5 cm. This allows the feeding height to be adjusted. The stand is robust and tilt-proof and is easy to clean with a damp cloth.

The wood may become discoloured if the stand is exposed to moisture for a long time. Cooking oil can be rubbed into the wood for added protection against moisture and dirt.
