

DENK BIRD FEEDER

Thanks to its transparent design, the *Bird Feeder* is ideal for bird watching—it's a lot of fun. At the same time, the open structure ensures that the birds feel safe. In addition to loose seed, you can also hang a seed ball from the frame. This meets the feeding needs of most songbirds. Please do not feed them food scraps or foods containing salt, as this is harmful to the birds.

The *Bird Feeder* consists of three parts made of *Granicum*[®] or *CeraNatur*[®] and a stainless steel frame. The parts are simply stacked on top of one another. They stand so securely that even a storm cannot damage the *Bird Feeder*. The high-quality, sturdy ceramics are frost-resistant and weather-resistant. The surface is pleasantly rough, so that birds can find a secure foothold.

We also offer the *Bird Feeder* as a set with a stand made of stainless steel. Mice and rodents will no longer be able to reach the birdseed. The birds are safe from cats, and you can observe them even better. This is the same stand used for our bird bath.

As a third option, we also offer the *Bird Feeder* with a stainless steel hanging kit. Using the included carabiner, it can be safely hung from trees without causing any damage.

Cleaning

To protect against parasites and the spread of pathogens, the feeder must be cleaned regularly. Please clean it with clean water and a brush. Use vinegar essence for heavy soiling.

Bird Feeder available as an optional set with a stand or a hanging mount

Ø 37cm | H 15cm | 4,7kg

With a stand H 64cm | With hanging mount L 110cm
