

DENK BIRD BATH

A magnet for a wide variety of birds in your garden. Your feathered friends can take a refreshing bath or quench their thirst from both the edge and the central island. Insects also love to use the *Bird Bath*. It is available in *Granicium*[®] or *CeraNatur*[®]. Both ceramics are unglazed and natural, completely frost-proof, and weather-resistant. We offer a 15-year material warranty on them.

You'll find suitable spots in any garden—on lawns, gravel areas, walls, or patios. Your feathered guests will appreciate the cool water, which should be refreshed daily if possible. Even in winter, when birds need water most urgently, the bird bath can be used. Since it is frost-resistant, ice formation won't damage it.

.....

It's important to keep the *Bird Bath* clean. A mixture of dirt, algae, and plant debris quickly accumulates in standing water. To protect against parasites, the bird bath should be cleaned regularly. This is done with clean water and a stiff brush. Never use disinfectants. For stubborn dirt, you can use a small amount of vinegar essence. Please rinse thoroughly with clean water afterward.

Optional stand

made of stainless steel

Ø 34cm | H 50cm | 2kg
