NATURE 88

Dear valued customer,

Sustainability has been one of our main concerns for many years, and this important issue is now at the heart of society, something that makes us very happy.

Whether you want to enjoy atmospheric lighting, are looking for some help in the kitchen or want to equip your garden with species-appropriate conservation products, we have what you are looking for. You can find the entire range, lots more information about our products, as well as photos from our workshops online at www.denk-keramik.de.

With the glass hoods, we have significantly expanded the range of applications for our *Waxburners*. The new light glass hood for the *Outdoor Waxburner* multiplies the flame and thus increases the light effect of the *Waxburner*. The *Baguette Baker* is new in our kitchen range. We have extended our line of essential oils by two new fragrance compositions.

My wife Jutta and I, as well as our staff, would be delighted if you chose one of our handmade, durable, unique pieces.

Fabian Denk Jutta Denk

Best wishes from Coburg,
Fabian and Jutta Denk

BRAZIERS

COSYROAST

WAXBURNERS

In your living room, on your balcony or patio, or in a snow-covered garden – *Waxburners* can be used wherever you need atmospheric lighting.

Waxburners only need safe wax as fuel, and are easy to top up with leftover candles or wax pastilles. This makes them perfect for recycling old wax, so you can look forward to an attractive flame, with a clear conscience.

Indoor

For indoor use
Steady flame
Up to 12 h burning time
Refillable with leftover candles / wax

BRAZIERS

With our braziers, you can enjoy light, warmth and a romantic fire in the garden, on the patio or on the balcony. Denk braziers are made from *CeraFlam®*.

CeraFlam® is permanently heat-proof, stores heat three times longer than steel and does not age. Our braziers can be used to burn wood anywhere outdoors.

They are transportable and create a wonderful light, a homely atmosphere and a cosy warmth within minutes. What's more, you can BBQ and roast with every Denk brazier.

COSYROAST®

The lightning-fast outdoor stove. Put the food on the fire and let everyone take their place around it. It creates such a cosy and sociable atmosphere! The chef is still in charge – not alone at the cooker as usual, but right at the heart of the social gathering.

Preparing delicious food is a shared pleasure. Frying, roasting, braising or BBQ – this feast among friends and family will turn into a culinary occasion that everyone will want to repeat.

The CeraFlam® CosyRoast is very easy to use. Use our Quick Briquettes, charcoal or wood as fuel. The Quick Briquette supplied ignites quickly and a light draught will encourage the fire to take. Just put on the frying pan and enjoy cooking among friends.

PIZZA STONE

BREAD&CAKE

The patented baking dish

The *Bread&Cake* Baking Dish transforms amateur bakers into artists who will astonish everyone, not least with our lovingly tried and tasted recipes.

Bread&Cake is made from heat-retaining *CeraFlam*® ceramic. Like a real, wood-fired oven, it encourages formation of an even crust, even on the underside of the bread, without burning. You will love how easy it is to make bread and cakes.

Bread&Cake is designed for recipes using up to 750 g flour (*Bread&Cake XL* for up to 1500g) and comes with a detailed recipe book.

Bread&Cake

BAGUETTE BAKER

for perfectly crusty baguettes

Original French baguettes are hard to find. But baguette with cheese, ham or as an accompaniment to traditional French dishes isn't just for gourmets. Put an end to this dilemma by easily baking your own baguettes with our patented baking dish! With our *Baguette Baker*, you can bake your own baguettes without French bakery training.

It enables a wonderful crispy crust to form, while the bread inside stays moist and light. The targeted moisture combined with the heat-retaining ceramic also achieves the best results with cakes or pastries.

Baguette Baker
L 38cm | W 28cm | H 4cm | 2.9kg

ROLL BAKER

The patented baking dish

Wake up your family to the delicious aroma of homebaked Sunday rolls. It's really easy, even in your pyjamas or dressing gown. With our patented baking dish, you can bake delicious, crusty Sunday rolls even without years of experience.

How about sweet-smelling currant buns, crusty Sunday rolls, fine poppy-seed rolls or hearty ham rolls? You can prepare all of this and much more with the CeraFlam® Roll Baker.

Roll Baker
Ø 37cm | H 4.5cm | 4.5kg

BREAD BIN

Keeps your breads fresh for longer

The *Bread Bin* made of breathable *CeraNatur®* ceramic is ideal for storing bread, cakes and pastries. The combination of unglazed ceramic and a cover made of natural linen creates the perfect atmosphere for storing bread, cakes and pastries. Both materials have a moisture-regulating effect and allow air to circulate in the container. Bread, cakes and pastries stay fresh for longer and retain their own flavour. Mould formation is effectively prevented if storage periods are correct.

Fluting on the base of the container prevents bread, cakes and pastries from sitting directly on the bottom of the container and also improves air circulation. The *Bread Bin* is the perfect place to keep bread baked with the *Bread&Cake* baking dish. This handmade, elegant piece looks great in any kitchen.

Bread Bin

Ø 35 cm | H 15 cm | Vol. approx. 8.5 L | 4.5 kg

STORAGE BOWL

Storing fruit and vegetables the natural way

The *Storage Bowl*, made of breathable *CeraNatur®*, is designed for natural storage of fruit and vegetables. The *Storage Bowl* protects its contents against light, and ensures good air circulation so that no condensation forms. The ceramic neither absorbs nor gives off odours.

The connectable beech wood dividers enable the bowl to be divided up into separate sections. Beech is very hard, which makes it ideal for use in direct contact with foods, so you can store carrots right next to onions or potatoes. We also include a cover made of high-quality Upper Lusatian linen, with sewn-in elasticsation. This linen rapidly absorbs and releases moisture.

Storage Bowl

Ø 39.5 cm | H 16 cm | vol. approx. 12.5 L | 6.0 kg

💡 Storage info

Tomatoes and apples give off the gas ethylene that accelerates the ripening process.

For that reason, they shouldn't be stored together with other varieties of fruit and vegetables.

ROCK CELLAR

Ripen cheese in the perfect microclimate

The *Rock Cellar* is made from *Granicum*®.

A balanced, even climate builds up inside it, which makes it ideal for storing and ripening cheese. The *Rock Cellar* achieves what cheese connoisseurs want. *Granicum*® is a purely natural product that is food-safe and dishwasher-safe.

The *Rock Cellar* is the ideal place to rest, store and ripen hard and soft cheese. Just put the cheese under the cover and then store the *Rock Cellar* in your kitchen or pantry without cooling it.

The cheese will then be deliciously ripe when you enjoy it.

Rock Cellar
Ø 23 cm | H 15 cm | 3.9 kg

YOGHURT MAKER

Fresh Yoghurt in an Instant

Make your own, fresh yogurt in an instant with the *Yoghurt Maker*. All you need is warm milk and three dessert spoons of yoghurt as a starting culture.

The high heat-retention capacity and simultaneous low heat conductivity of our granite ceramic is crucial to the function of the *Yoghurt Maker*. *Granicium®* retains heat around 20× longer than steel.

Also suitable for lactose-free milk and soy milk.

Yoghurt Maker
H 14.5cm | Ø 15cm | 700 ml | 1.35 kg

MORTARS

Enjoy the full aroma

Herbs and spices freshly crushed in a mortar are particularly aromatic and loved by cooks and foodies. Unlike grinding, crushing herbs and spices in a mortar squeezes the essential oils out of the flavour components. We like crushed spices better than ground ones.

Our mortars and pestles are made from *Granicium*® – the crystalline surface is comfortable and non-slip, making it ideal for grinding. The material is also food-safe, extremely robust and dishwasher-safe.

Hand Mortar
Ø 9cm | H 10cm | 500g

Rocker Mortar
Ø 14cm | 1.4kg

HERB PLANTER

Our *Herb Planter* is suitable for standard potted herbs. Put your herbs into the planter in their plastic pot. The base of the planter has incorporated spacers. This means that your herbs do not stand in water, which protects the roots against rotting and guarantees good growth.

As well as having a decorative appearance, the *Herb Planter* is also very practical. Each planter also comes with a high-quality pair of herb scissors that are held onto the outside of the pot by an integrated magnet.

Herb Planter with scissors and magnetic holder
Ø 16cm | H 13.5cm | 1kg

CELTIC CAULDRON

For cooking on an open fire

The *Celtic Cauldron*, made of glazed *CeraFlam®* ceramic, is designed for cooking and roasting on an open fire. It can be used on a charcoal or gas barbeque, on a *Brazier* or on the *Denk CosyRoast*. But, of course, you can use it in your oven too.

The *Celtic Cauldron* is excellent for cooking and roasting, and it also makes an attractive centrepiece for any table.

Celtic Cauldron
H 9 cm | Ø 30.5 cm | Vol. 3.0 l | 2.7 kg

CELTIC PLATE

For cooking and BBQs on an open fire

The *Celtic Plate* can be used in a variety of ways for cooking and BBQs on an open fire or in the oven. It makes flash-frying – fish, meat or vegetables – easy. It also gives a wonderful crispy base to focaccia or pizza made with thin dough.

Plus, the *Celtic Plate* can also be used as a lid or base for the *Celtic Cauldron*.

The special glaze on the *Celtic Cookware* means that you can fry without using any fat. That really intensifies those delicious cooking smells.

Celtic Plate
H 2.7 cm | Ø 30.5 cm | 1.4 kg

CELTIC BOWL

From the fire straight to the table

The *Celtic Bowl* is the largest of our fireproof cookware pieces. It has a raised rim for making perfect soufflés, gratins and quiches, as well as roast dishes. The *Celtic Bowl* is also great for baking cakes and tarts.

CeraFlam® ceramic stores around 3 × more heat than steel. This ensures that heat is conducted evenly during cooking for perfect roasting and baking results. Food also stays warmer for longer in the *Celtic Bowl* once it is ready to serve.

Celtic Bowl
H 4cm | Ø 37.5 cm | 2.6 kg

PIZZA STONE

Fireproof and food-safe

What makes the perfect pizza? A nice, crispy edge and base. We have made a *Pizza Stone* from our heat-retaining *CeraFlam®* ceramic, for baking the perfect pizza.

The Denk *Pizza Stone* is made from heat-retaining *CeraFlam®*. Our fire ceramic is flavour-neutral, robust, durable ceramic that is proven to be food-safe and capable of storing enormous amounts of heat. All of these qualities are essential for making a good pizza.

Pizza Stone
H 2cm | Ø 34 cm | 3 kg

WATER

3QUELLEN SYSTEM

WIV MINI FILTER

PULSATOR

GLASS PITCHER

SPRING WATER IN YOUR HOME

Our 3Quellen® technology brings us closer to the dream of fresh spring water within our own four walls. It enables you to activate your mains water using a natural process that requires neither an electrical current nor additives. Patented 3Quellen water activation combines three natural methods in one piece of equipment.

Mains water is swirled in the 3Quellen water activator using shaped ceramic stones. Special minerals and ceramic micro surface structures also affect the water. Our triple patented water activation is the only method of its kind in the world.

Our technology is easy to install into your water main (centralised or decentralised), maintenance-free and will work for a long period without wear. To go with our 3Quellen devices, we also supply a depth filter for drinking water purification. Most harmful substances (e.g. medication residue, hormones or heavy metals) can be absorbed by a coconut membrane that does not alter the mineral content of your drinking water.

Patented water activation

PATENTS: 102009003162, 102014100025, EP2891641

Patented 3Quellen water activation combines three natural methods:

1

Swirling

The image of the rushing waters of a mountain stream makes the principle of “activated” water in nature easier to grasp. The built-in shaped ceramic stones create a vortex in the patented 3Quellen device. This dynamizes and activates the water.

2

Changes in charging properties

The charging properties of water change upon contact with silicate surfaces, which is why we make the shaped ceramic stones from CeraAktiv® ceramic. The ceramic is only available from us. We developed it and we patented it. CeraAktiv is made of special silicate minerals, crystals, quartzes and feldspar stones that are not soluble in water.

3

Surface maximisation

The shaped ceramic stones are produced with our patented Porosium® surface, which makes it possible to create up to 100m² of surface area for every gram of ceramic, achieving the tiniest structures and maximising the active surface. This boosts turbulence and the effect of contact.

1:200

1:1.000.000

3QUELLEN MODEL S

Decentralised connection to the drinking water point (e.g. kitchen angle valve)

- Patented water activation with CeraActiv® ceramic activation cascade
- For self-assembly in any installation position. Ready for installation with connection set

Made of white polypropylene

H 12.5 cm, W 13 cm, L 7 cm, 0.4 kg

Operating pressure: min. 2 bar – max. 6 bar
Water temperature: 5 – 23 °C
Capacity: unlimited
Volumetric flow rate: max. 5 l/min*
no filtration
Use: drinking water
Connection: 3/8 inch external thread
Pressure reduction: approx. 0.1 bar*

*Values indicated depend on local water pressure.

3QUELLEN MODEL M

For houses with up to 2 accommodation units

- Patented water activation with CeraActiv® ceramic double activation cascade and pulsator disc
- Centralised connection to the mains water supply
- The device is maintenance-free and will function for a long period without wear
- Installation by a specialist required

Component testing: DVGW reg. no NW 9301CQ0351

H 31 cm, W 22.5 cm, L 13.5 cm, 3.4 kg

Operating pressure: min. 2 bar – max. 6 bar
Water temperature: 5 – 23 °C
Capacity: unlimited
Volumetric flow rate: max. 1.5 m3/h*
no filtration
Use: drinking water
Connection: R 1 inch external thread
Pressure reduction: approx. 0.2 bar*

3QUELLEN MODEL L

For houses with up to 6 accommodation units

- Patented water activation with 5 source stones made of CeraActiv® ceramic
- Centralised connection to the mains water supply
- The device is maintenance-free and will function for a long period without wear
- Installation by a specialist in any installation position

Component testing in accordance with the Pressure Equipment Directive 2014/68/EU

W 22 cm, H 30.5 cm, L 25 cm, 12 kg

Operating pressure: min. 2 bar – max. 8 bar
Water temperature: 5 – 20 °C
Capacity: unlimited
Volumetric flow rate: max. 5 m3/h*
no filtration
Use: drinking water
Connection: R 1 inch internal thread
Pressure reduction: approx. 0.2 bar*

WIV® MINI FILTER

Decentralised connection to the drinking water point (e.g. kitchen angle valve)

- Filter with coconut membrane
- Most harmful substances (e.g. medication residue, hormones, heavy metals) can be absorbed
- The mineral content of the drinking water is not altered
- Ideal for combining with 3Quellen® water activation
- For self-assembly in any installation position. Ready for installation with connection set

Component testing: WRAS valid until 4 / 2023

H 29 cm, W 10 cm, L 10 cm, 0.8 kg

Operating pressure: min. 3 bar – max. 6 bar
Water temperature: 5 – 23 °C
Capacity: approx. 5,000 l* / max. 12 months
Volumetric flow rate: max. 5 l/min* (new cartridge)
Use: drinking water
Manufacturer: BBB Gebäudetechnik GmbH
Connection: 3/8 inch external thread
Pressure reduction: approx. 0.3 bar*

3QUELLEN PULSATOR

Handheld device for activating drinking water

The *CeraActiv*® ceramic *Pulsator* is an easy way to activate your drinking water. The forward and backward rotation (like a whisk) of the *Pulsator* creates a double swirl and transfers kinetic energy into the water.

Shaft and screw fixing made of V4A stainless steel

Ø 8 cm, L 31 cm, 260 g

Water temperature: max. 70 °C

Container volume: max. 2 l

Use: Drinking water

Cleaning: by hand using washing-up liquid

3QUELLEN GLASS PITCHER

Glass pitcher for active drinking water

We have developed a special glass in collaboration with glassmaker Cornelius Réer. *EMCrystal*® can only be hand-blown in special wooden moulds. It cannot be made in industrial production. *EMCrystal* is protected as a trade mark.

Mouth-blown from EMCrystal glass

Ø approx. 18 cm, H 21 cm, 1.1 kg, 2 litres

Water temperature: max. 50 °C

Capacity: 2 l

Use: Drinking water

Cleaning: by hand using washing-up liquid

LIVING

LUXOR

LIGHTHOUSE

PLANTER

ORCHID POT

SCENT TREASURE

SCENT ROSE

FIRELIGHTER

LUXOR

The multi-functional light with power point

The *Luxor* is a portable garden light with 5m connecting cable and a sturdy and non-dazzling opal glass dome. A high-quality socket for unobtrusive power supply has also been incorporated into the base. It is easy to connect *Luxor* to *Luxor* and flexibly illuminate your house and garden at any time. It means you always have a nearby source of electrical power, e.g. for an electric lawn mower, hedge trimmers or christmas lights.

15-year weather-proof guarantee.

Luxor
Ø 26.5 cm | H 27 cm | 8.2 kg

LIGHTHOUSE

The classic

Warm, soft light deserves a home of its own – our *Lighthouse*. The *Lighthouse* is a sturdy, high tower with a secure, square, pointed roof. Four ceramic archways at the top let out plenty of light on all four sides.

The *Lighthouse* is so authentic and original that it belongs in every sophisticated house or garden design. The *Lighthouse* is available in two sizes. A plug socket, motion sensor or switch can be incorporated into the large version.

15-year weather-proof guarantee.

Lighthouse, large
L 30 cm | W 30 cm | H 80 cm | 28 kg

Lighthouse, small
L 26.5 cm | W 26.5 cm | H 46.5 cm | 10.5 kg

The *Lighthouse* has been around for over 40 years. The idea behind it was that garden lights should be more than just inferior sources of light. Our ceramic already radiates its own warmth and naturalness and, combined with warm light, it makes our unique *Lighthouse*. After all this time, we can rightly call it a classic.

You can see the original *Lighthouse* in the picture at the top. It has now been at our workshops since 1976, shows the way during the day and gives off a non-dazzling, romantic light in the evening.

PLANTER

With openings for climbing supports

The *Planter* made of *CeraNatur*®, with openings for climbing supports, is suitable for gardens, balconies and terraces. It provides the perfect conditions for growing climbing plants.

The *Planter* is ideal if you want to plant bushy plants such as roses, tomatoes or cucumbers. Simply insert four canes into the integrated openings and leave your plants to climb.

For optimum growth and the best yields, the height of the *Planter* has been chosen to enable layered set-up, as in a raised bed. We show you how easy it is in the description enclosed.

15-year weather-proof guarantee.

ORCHID POT

In the wild, tropical orchids grow on trees. Their aerial roots require high air-humidity, which makes orchids difficult to grow as houseplants. Our patented *CeraNatur® Orchid Pot* enables you to simulate the conditions in which orchids would naturally live and guarantee the perfect environment for growth.

Our patented *Orchid Pot* consists of a pot and a water reservoir to prevent build-up of damp and rotting. We have incorporated a water-absorbent, long-lasting wick into the base of the pot for constant moisture supply.

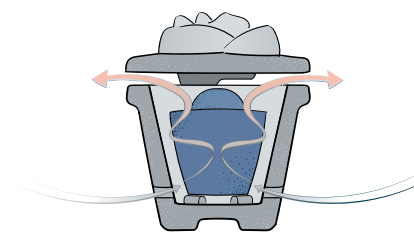

SCENT TREASURE

Experience fragrance in a whole new way!

The patented *Granicium® Scent Treasure* is a three-stage adjustable diffuser for all kinds of liquid fragrances. Its washable fragrance reservoir absorbs oils, essences or perfumes and diffuses them into the air over a long period.

You can put the *Scent Treasure* anywhere in your home. As well as aromatic oils, you can also use perfumes or room fragrances in the *Scent Treasure*. We supply a range of high-quality, pure and natural essential oils (see p. 28).

Scent Treasure
3-piece | Ø 10.5 cm | H 12 cm | 0.8 kg

SCENT ROSE

Enjoy fragrances decoratively

The Scent Rose is made of porous special porcelain. This self-developed material guarantees an optimal scent absorption and storage. The rose relief is both decorative and functional. The surface is greatly enlarged by the shape. The result is a long-lasting scent effect.

Any fragrance can be dripped onto the porous porcelain to release its aromas over a long period of time. These can be aromatic oils, perfumes or other liquid fragrance essences. Depending on the size of the room and the desired fragrance intensity, just a few drops of aroma oil are sufficient.

We supply a range of high-quality, pure and natural essential oils (see p. 28).

FIRELIGHTER

Light fires with vegetable oil or leftover candles

You can safely and cleanly stack large pieces of firewood with the *CeraFlam® Firelighter*. The large, curved fire groove allows the initial flame to come into contact with the entire width of the wood. This immediately creates a high temperature and a flue draught. Particulates and odour are reduced.

The wood catches fire very quickly. While the fire is lit, the *Firelighter* remains in the embers where it also stores thermal energy, increasing the energy efficiency of the fireplace. Once it has cooled down, the *Firelighter* can be removed and reused. No cleaning is necessary.

You can use vegetable oil and leftover candles as fuel in the *Firelighter*. These energy sources are cheap, ecological and found in every household. You will love how safe and easy lighting your fire can be.

BIRD BATH

Granicium®

An attraction that will bring a variety of birds to your garden. Your feathered friends can enjoy a refreshing bath, or quench their thirst from the edge, as well as from the central island. The material is rough enough to offer secure footing for every bird.

A suitable site for the bath can be found in any garden – on lawns, gravel, walls or terraces. Your visitors will appreciate the cool liquid, which should ideally be topped up every day. The *Bird Bath* can even be used in winter when birds desperately need water. As it is frost-proof, it will not be affected by ice.

The *Bird Bath* can be raised off the ground using the optionally available stainless steel stand. This keeps birds safe from cats and makes them even easier to observe. The *Bird Bath* is made from *Granicium*. It is unglazed and natural, totally frost-resistant and weatherproof.

15-year weather-proof guarantee.

Ø 38 cm | H 6.5 cm | 5 kg

Bird Bath with stainless steel stand
Ø 38 cm | H with stand 55 cm | 7 kg

BIRD TABLE

Granicium® / CeraNatur®

The patented *Bird Table* is a species-appropriate bird feeder that birds can fly into from all sides. Its transparent structure makes the *Bird Table* ideal for birdwatching – a fascinating way to pass the time. At the same time, the open structure makes birds feel safe.

The frame has an option for hanging up fat balls, as well as scattering feed, so you can satisfy the dietary requirements of most songbirds. The *Bird Table* has a three-part structure made from ceramic and a rust-proof, stainless steel frame. The pieces are easy to put together. They are so secure that the *Bird Table* can even withstand storms.

A rust-proof, stainless steel stand is available to go with the *Bird Table*. The stand keeps birds safe from cats and makes them even easier to observe. The stand is the same for our *Bird Bath*.

15-year weather-proof guarantee.

💡 Bird-feeding info

If you use suitable food, you can feed and observe birds all year round. However, you should cut right down on feeding in the summer so as not to influence natural behaviour.

AROUND

Granicium®

Around is designed as a bird table or bird bath for hanging on your balcony, terrace or even in a tree. A hanging bird table or bath keeps birds safe from cats and makes them easier to observe. The ceramic shell for use as a bird bath is sealed. The shell for use as a bird table has two holes for drainage.

We developed *Around* in collaboration with Italian designer and bird expert, Luca Galmarini.

The rough *Granicium*® surface gives birds security. The high-quality ceramic is frost-proof, UV-resistant and sea water-resistant. We give a 15-year weather-proof guarantee.

Around
Ø 28.5cm | H 65cm | 5 kg

FEEDING ROOF

CeraNatur®

The *Feeding Roof* is used as a holder for bird feed dumplings. It looks attractive when hung by its high quality brass chain on branches or in bushes. The feeding roof provides shelter from rain and keeps the food dry and mould-free. You will be delighted when the *Feeding Roof* becomes the focal point for your garden birds.

15-year weather-proof guarantee.

Feeding Roof

Ø 14.5 cm | H 20 cm (with chain) | 0.3 kg

NESTING BOXES

CeraNatur®

The *Nesting Boxes* blend seamlessly into the natural surroundings, so they are readily accepted by nesting birds. The ceramic is very hard and durable, so it can even withstand attacks by woodpeckers.

CeraNatur ceramic is temperature regulating. It stores up heat during the day and radiates it overnight. It is not susceptible to mould and will not be affected by bird droppings.

15-year weather-proof guarantee.

NESTING HOLE

CeraNatur®

Although the wren is the second smallest bird in Europe, its voice would put even Caruso in the shade. The powerful song of the male starts early in the morning and only quietens down late in the evening. To keep their energy levels high, wrens eat plenty of insects. Wrens build their nests close to the ground in hedges and bushes.

The *Nesting Hole* can simply be hung on the rope supplied, without damaging trees or bushes. The roof and the rope are attached to the body. This makes the *Nesting Hole* safe from predators. To clean, pull the roof upwards and then simply wash out the nesting hole. Wrens will also use this hole as somewhere to shelter during the winter. It's also suitable for tits, depending on the hanging height.

15-year weather-proof guarantee.

Nesting Hole for wrens and tits
Ø hole 2.8cm | Ø 18cm | H 14cm | 2kg

WILD BEE HOUSE

CeraNatur®

There are nearly 2,000 species of wild bee in Europe and around 9% of them are facing extinction. You can make an important contribution to preserving these species with the *Wild Bee House*.

The CeraNatur® *Wild Bee House* has a recess on the back for easy mounting onto trees, buildings or pergolas. It is woodpecker-proof and suitable for the most common solitary insects:

Masked bees, solitary wasps and mason bees: 2-4 mm

Scissor bees: 3-5 mm

Rust-red mason bees; leaf-cutter bees: 5-7 mm

European orchard bees: 6-9 mm

15-year weatherproof guarantee.

Wild Bee House
L 18 cm | W 11.5 cm | D 6.5 cm | 1.8 kg

FLOWER WILD BEE HOUSE

CeraNatur®

The *Wild Bee Flower* is made of durable CeraNatur® ceramic and has more than 48 woodpecker-proof nesting tubes of different diameters, for the most common solitary insects.

It comes with a rope for hanging on trees, fences or posts, etc. It does not need to be protected from rain. Please make sure that the insects have a clear approach and that the *Wild Bee Flower* is not covered by leaves hanging close by.

15-year weatherproof guarantee.

Flower Wild Bee House
Ø 18 cm | H 9 cm | 3.5 kg

💡 Bee info

Wild bees are essential for pollination. Unfortunately, their numbers have sharply declined in recent years, so species-appropriate nesting aids are extremely important.

BUMBLE-BEE CASTLE

Granicium® / CeraNatur®

The *Bumble-bee Castle* has been made with bumble-bees' needs in mind. Its two-piece structure with insulating bottom panel is made entirely from ceramic and is frost-proof and stable. The entrance is painted blue to encourage bumble-bees to come inside. Bumble-bees start to hibernate in the *Bumble-bee Castle* in the autumn and build their nests in it in spring.

The *Bumble-bee Castle* helps bumble-bees to become established in the garden and it is also a very attractive decoration.

15-year weather-proof guarantee.

Granicium® Bumble-bee Castle
Ø 27 cm | H 16 cm | 5.5kg

CeraNatur® Bumble-bee Castle
Ø 27 cm | H 16 cm | 5.5kg

Bumble-bee info

Bumble-bees are hardworking garden helpers. Unlike honey-bees, they also fly on cool and wet days, so they make sure that plants and flowers are pollinated.

EARWIG HOUSE

CeraNatur®

The earwig is a useful and harmless insect. They love to eat harmful greenfly that can cause large amounts of damage to fruit and flowers. Earwigs are useful to people as an organic form of pest control. Earwigs are nocturnal and return to their earwig house to sleep during the day.

The *Earwig House* will be occupied between the end of April and the end of October. The *Earwig House* should be placed in a shady location, as close to the ground as possible, over a branch or a stick. The earwigs will soon get to work.

15-year weather-proof guarantee.

Earwig House

Ø 3cm | H 12cm | 300g | set with 3 pieces

💡 Earwig info

Earwigs are useful to people as an organic form of pest control. They love to eat harmful greenfly that can cause large amounts of damage to fruit and flowers.

HEDGEHOG HOUSES

CeraNatur®

The CeraNatur® hedgehog houses are frost-proof and provide protection all year round. Hedgehogs are not only cute, but an important pest-control expert. Hedgehogs will remain in the same territory if conditions are right. They prefer a dry, safe home that cannot be sniffed out by dogs.

Dig the hedgehog houses down into the earth a little, make a bed of leaves inside and cover it with grass, bark and leaves. The hedgehog houses protect hedgehogs in hot summers and cold winters.

15-year weather-proof guarantee.

Hedgehog Ritz
L 32 cm | W 30 cm | H 14 cm | 3.5 kg

Hedgehog Snail-Shell
Ø 35 cm | H 16 cm | 4.5 kg

💡 Hedgehog info

The hedgehog is protected all year round. It is nocturnal and feeds on insects, larvae and molluscs. During hibernation, hedgehogs can live up to half a year without food.

MINKA'S TILED STOVE

The electric heated cat bed

Minka was the name of our workshop cat. Because she always liked to make herself comfortable on the radiator, we made her her own little tiled stove. Cat lovers and breeders have been using *Minka's Tiled Stove* for a few years now. Our customers are delighted with the positive effect on their pets.

Minka's Tiled Stove is made from *CeraNatur*® ceramic and heated electrically. The self-regulating heating element has an economic output of 10 watts and heats up the *Tiled Stove* to a constant 48°C. Electricity costs amount to around 5 Euro cents / 24 hours. *Minka's Tiled Stove* is TÜV tested. It also comes with a straw-filled cushion.

Minka's Tiled Stove
W 44 cm | H 7 cm | D 33 cm | 6.1 kg

CeraNatur®

Sandstone-coloured clay forms the basis for our natural ceramics. This clay is a geological anomaly that is only found in Coburg, in a thin layer of earth. We fire *CeraNatur*® at a high temperature to make it robust and frost-proof. Its naturally shimmering brown tones and velvety-soft surface never fail to delight us.

Properties

CeraNatur® is a wonderful material, with many different uses in the home and garden. In addition to its outstanding material properties, it has a wonderfully natural appearance that is unique among ceramics.

frost-proof

robust & durable

waterproof

acid & sud-resistant

CeraLava®

Lava sand combined with special clays from the Westerwald creates an almost black ceramic. It is a rarity and that is exactly why we like it so much. *CeraLava*® is as robust as it is frost-proof. Despite its monochrome surface, this special ceramic exudes warmth and depth.

Properties

With its quiet power, *CeraLava*® is a wonderful backdrop for light and fire. It gives our Waxburners and Luxor lights even more expression, without any of the restrictions posed by material properties.

frost-proof

robust & durable

waterproof

acid & sud-resistant

Granicium®

Granite is a particularly hard, mineral rock with a high quartz and feldspar content. Granite was formed from hardened magma over two kilometres deep, more than ten million years ago. Granite is characterised by its crystalline structure, high density and immense robustness and we wanted these qualities for our ceramics.

Properties

Granicium® is characterised by the properties of its raw material, granite. The high quartz and feldspar content makes the material especially robust and durable. The fine, crystalline composition makes various uses possible and creates a pleasantly non-slip surface.

frost-proof

robust & durable

waterproof

food-safe & flavour-neutral

acid & sud-resistant

heatretaining

CeraFlam®

We use *CeraFlam*® in products that need heatretaining and fireproof qualities. A similar composition to the material we have developed was used in American space shuttles for heat insulation. This type of ceramic is very rare and difficult to work with.

Properties

There is probably no other ceramic material with such exceptional qualities. Unlike normal ceramic, *CeraFlam*® is totally fireproof and can absorb and store three times more heat than steel. It is not susceptible to aging.

fireproof

robust & durable

acid & sud-resistant

food-safe & flavour-neutral

heatretaining

As a craft business, what matters most to us are people and the natural material, ceramic. Our pieces intentionally show signs of being handmade and the beauty of ceramic. Behind every piece that leaves our workshop is the skill and passion of our staff. The best products can only be made by exceptionally well-trained and motivated staff.

We want to give trained eyes and sensitive souls long-lasting enjoyment with our authentic design that does justice to the material. Our products should convey quality and beauty. DENK has won numerous national and international design prizes and diplomas.

You will only find products of the type and function of many of our creations at DENK. Our developments and innovations are protected by numerous national and international patents, trade marks and other protective rights. This protects our customers and secures jobs in Germany.

Our registered trade marks are:

*Denk® / Schmelzfeuer® / CosyRoast® / Duftschatz® /
