FIRE 04

FOOD 44

WATER 74

LIVING 80

NATURE 90

Dear valued customer,

We would like to use this catalogue as an opportunity to introduce you to two new products related to sustainability and environmental protection. We hope that they will fill you with even more enthusiasm for the natural world and for your garden.

Our new Camping Waxburner is a portable campfire. Enjoy the light, warmth and romance of a fire on your travels, on the beach, at a picnic or anywhere you like. Like all Waxburners it works with wax or leftover candles and is safe and sustainable. To deter annoying insects you can simply use our optionally available Anti-insect oil.

Our patented Insect Station is another new product. It is a drinking and feeding station in one. Natural food sources are continuing to dwindle, insect populations are declining and the balance of nature is being upset. You can actively help to protect insects with our Insect Station. Garden lovers will be rewarded because wasps and bees much prefer resting at the Insect Station, leaving you to enjoy your coffee in the garden undisturbed.

Best wishes from Coburg,

Fabian Jank *Jutta Deuke*

BRAZIERS

COSYROAST

WAXBURNERS

In your living room, on your balcony, in the garden or for camping – *Waxburners* can be used wherever you need atmospheric lighting.

Waxburners only need safe wax as fuel, and are easy to top up with leftover candles or wax pastilles. This makes them perfect for recycling old wax, so you can look forward to an attractive flame, with a clear conscience.

Indoor

For indoor use
Steady flame
Up to 12 h burning time
Refillable with leftover candles / wax
—

Indoor with Glass Hood

For indoor & outdoor use
Strong, vivid flame
Up to 12 h burning time
Refillable with leftover candles / wax
Windproof

Outdoor

For outdoor use
Large, vivid flame
Up to 36 h burning time
Refillable with leftover candles / wax
Windproof

Outdoor with Glass Hood

For outdoor use
Large, vivid, intensified flame
Up to 36 h burning time
Refillable with leftover candles / wax
Windproof

CAMPING WAXBURNER

Made for adventures in the great outdoors. The new *Camping Waxburner* is especially robust and stable but also lightweight. *CeraLava*® means it doesn't show the dirt.

The lid included can be fixed onto the *Waxburner* with a hook-and-loop strap for secure transport inside the bag.

It goes without saying that the *Camping Waxburner* also looks great in your garden or on your balcony at home.

Camping

- For outdoor use
- Large, vivid flame
- Up to 36 h burning time
- Refillable with leftover candles / wax
- Windproof, portable

We supply our own range of 100% pure and natural essential oils to go with our Waxburners.

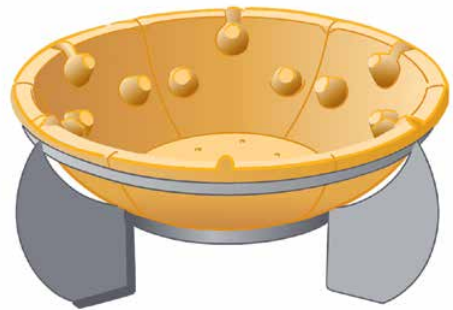

For your well-being and for a successful aromatherapeutic effect, we also value maximum quality for our oils.

BRAZIER

With our braziers, you can enjoy light, warmth and a romantic fire in the garden, on the patio or on the balcony. Denk braziers are made from *CeraFlam®*.

CeraFlam® is permanently heat-proof, stores heat three times longer than steel and does not age. Our braziers can be used to burn wood anywhere outdoors.

They are transportable and create a wonderful light, a homely atmosphere and a cosy warmth within minutes. What's more, you can BBQ and roast with every Denk brazier.

COSYROAST®

The lightning-fast outdoor stove. Put the food on the fire and let everyone take their place around it. It creates such a cosy and sociable atmosphere! The chef is still in charge – not alone at the cooker as usual, but right at the heart of the social gathering.

Preparing delicious food is a shared pleasure. Frying, roasting, braising or BBQ – this feast among friends and family will turn into a culinary occasion that everyone will want to repeat.

The CeraFlam® CosyRoast is very easy to use. Use our Quick Briquettes, charcoal or wood as fuel. The Quick Briquette supplied ignites quickly and a light draught will encourage the fire to take. Just put on the frying pan and enjoy cooking among friends.

BREAD&CAKE

The patented baking dish

The *Bread&Cake* Baking Dish transforms amateur bakers into artists who will astonish everyone, not least with our lovingly tried and tasted recipes.

Bread&Cake is made from heat-retaining *CeraFlam*® ceramic. Like a real, wood-fired oven, it encourages formation of an even crust, even on the underside of the bread, without burning. You will love how easy it is to make bread and cakes.

Bread&Cake is designed for recipes using up to 750 g flour (*Bread&Cake XL* for up to 1500g) and comes with a detailed recipe book.

Bread&Cake

BAGUETTE BAKER

for perfectly crusty baguettes

Original French baguettes are hard to find. But baguette with cheese, ham or as an accompaniment to traditional French dishes isn't just for gourmets. Put an end to this dilemma by easily baking your own baguettes with our patented baking dish! With our *Baguette Baker*, you can bake your own baguettes without French bakery training.

It enables a wonderful crispy crust to form, while the bread inside stays moist and light. The targeted moisture combined with the heat-retaining ceramic also achieves the best results with cakes or pastries.

Baguette Baker
L 38cm | W 28cm | H 4cm | 2.9kg

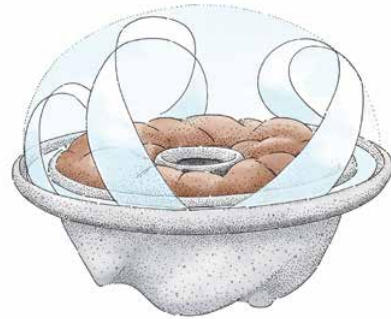

GUGELHUPF MAKER

The patented cake mould

Our cake mould makes baking fun and easy. Targeted evaporation from the water channel ensures that your cake stays moist on the inside and prevents the crust from burning. The glazed *CeraFlam*® ceramic stores heat from the oven and bakes the dough evenly all the way through.

Every cake mould comes with one of our grandma's cake recipes. Grandma Bertha's Gugelhupf cake is easy – even without years of baking experience. And most importantly, it really does taste delicious. This delectable nut Gugelhupf cake has always been part of our lives and now we get to share the enjoyment with you.

Gugelhupf Maker
Ø 32cm | H 9.5cm | 2.4kg

BREAD BIN

Keeps your breads fresh for longer

The *Bread Bin* made of breathable *CeraNatur®* ceramic is ideal for storing bread, cakes and pastries. The combination of unglazed ceramic and a cover made of natural linen creates the perfect atmosphere for storing bread, cakes and pastries. Both materials have a moisture-regulating effect and allow air to circulate in the container. Bread, cakes and pastries stay fresh for longer and retain their own flavour. Mould formation is effectively prevented if storage periods are correct.

Fluting on the base of the container prevents bread, cakes and pastries from sitting directly on the bottom of the container and also improves air circulation. The *Bread Bin* is the perfect place to keep bread baked with the *Bread&Cake* baking dish. This handmade, elegant piece looks great in any kitchen.

Bread Bin

Ø 35 cm | H 15 cm | Vol. approx. 8.5 L | 4.5 kg

STORAGE BOWL

Storing fruit and vegetables the natural way

The *Storage Bowl*, made of breathable *CeraNatur®*, is designed for natural storage of fruit and vegetables. The *Storage Bowl* protects its contents against light, and ensures good air circulation so that no condensation forms. The ceramic neither absorbs nor gives off odours.

The connectable beech wood dividers enable to the bowl to be divided up into separate sections. Beech is very hard, which makes it ideal for use in direct contact with foods, so you can store carrots right next to onions or potatoes. We also include a cover made of high-quality Upper Lusatian linen, with sewn-in elasticsation. This linen rapidly absorbs and releases moisture.

Storage Bowl
Ø 39.5 cm | H 16 cm | vol. approx. 12.5 L | 6.0 kg

💡 Storage info

Tomatoes and apples give off the gas ethylene that accelerates the ripening process. For that reason, they shouldn't be stored together with other varieties of fruit and vegetables.

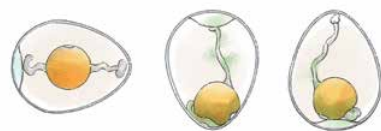

ROCK&ROLL®

Patented egg storage

Rock&Roll is a natural and decorative way to store eggs. Your eggs stay fresh for just as long or even longer, without the need for refrigeration.

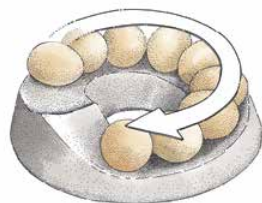

Your eggs won't absorb any odours and are easily accessible at the perfect temperature for use.

How it works

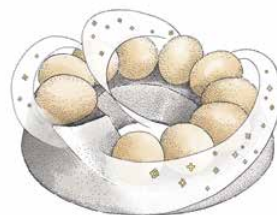

Lying position

The eggs lie on their side in their natural position, which prevents formation of germs in the yolk.

Rolling movement

Regular rolling (approximately every 2 days) keeps the chalaza flexible, which prevents germs from getting in.

Granicism® with rutile

Mineral pigments have been added to the food-safe granite ceramic. They have a photocatalytic effect against germs / bacteria.

Rock&Roll
Ø 24.5cm | H 5.5cm | 1.1 kg

ROCK CELLAR

Ripen cheese in the perfect microclimate

The *Rock Cellar* is made from *Granicum*®.

A balanced, even climate builds up inside it, which makes it ideal for storing and ripening cheese. The *Rock Cellar* achieves what cheese connoisseurs want. *Granicum*® is a purely natural product that is food-safe and dishwasher-safe.

The *Rock Cellar* is the ideal place to rest, store and ripen hard and soft cheese. Just put the cheese under the cover and then store the *Rock Cellar* in your kitchen or pantry without cooling it.

The cheese will then be deliciously ripe when you enjoy it.

Rock Cellar
Ø 23cm | H 15cm | 3.9kg

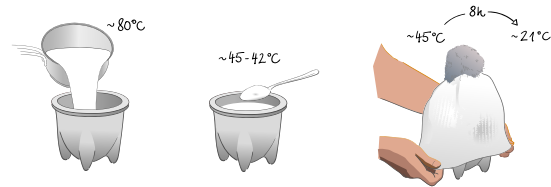

YOGHURT MAKER

Fresh Yoghurt in an Instant

Make your own, fresh yogurt in an instant with the *Yoghurt Maker*. All you need is warm milk and three dessert spoons of yoghurt as a starting culture.

The high heat-retention capacity and simultaneous low heat conductivity of our granite ceramic is crucial to the function of the *Yoghurt Maker*. *Granicium*® retains heat around 20× longer than steel.

Also suitable for lactose-free milk and soy milk.

Yoghurt Maker
H 14.5 cm | Ø 15 cm | 700 ml | 1.35 kg

HAND MORTAR

Enjoy the full aroma

Herbs and spices freshly crushed in a mortar are particularly aromatic and loved by cooks and foodies. Unlike grinding, crushing herbs and spices in a mortar squeezes the essential oils out of the flavour components. We like crushed spices better than ground ones.

Our *Hand Mortar* is made from *Granicum®* – the crystalline surface is comfortable and non-slip, making it ideal for grinding. The natural material is also food-safe, extremely robust and dishwasher-safe.

Hand Mortar
Ø 9cm | H 10cm | 500g

CELTIC CAULDRON

For cooking on an open fire

The *Celtic Cauldron*, made of glazed CeraFlam® ceramic, is designed for cooking and roasting on an open fire. It can be used on a charcoal or gas barbeque, on a *Brazier* or on the *Denk CosyRoast*. But, of course, you can use it in your oven too.

The *Celtic Cauldron* is excellent for cooking and roasting, and it also makes an attractive centrepiece for any table.

Celtic Cauldron
H 9 cm | Ø 30.5 cm | Vol. 3.0 l | 2.7 kg

CELTIC PLATE

For cooking and BBQs on an open fire

The *Celtic Plate* can be used in a variety of ways for cooking and BBQs on an open fire or in the oven. It makes flash-frying – fish, meat or vegetables – easy. It also gives a wonderful crispy base to focaccia or pizza made with thin dough.

Plus, the *Celtic Plate* can also be used as a lid or base for the *Celtic Cauldron*.

The special glaze on the *Celtic Cookware* means that you can fry without using any fat. That really intensifies those delicious cooking smells.

Celtic Plate
H 2.7 cm | Ø 30.5 cm | 1.4 kg

CELTIC BOWL

From the fire straight to the table

The *Celtic Bowl* is the largest of our fireproof cookware pieces. It has a raised rim for making perfect soufflés, gratins and quiches, as well as roast dishes. The *Celtic Bowl* is also great for baking cakes and tarts.

CeraFlam® ceramic stores around 3 × more heat than steel. This ensures that heat is conducted evenly during cooking for perfect roasting and baking results. Food also stays warmer for longer in the *Celtic Bowl* once it is ready to serve.

Celtic Bowl
H 4cm | Ø 37.5 cm | 2.6 kg

PIZZA STONE

Fireproof and food-safe

What makes the perfect pizza? A nice, crispy edge and base. We have made a *Pizza Stone* from our heat-retaining *CeraFlam®* ceramic, for baking the perfect pizza.

The Denk *Pizza Stone* is made from heat-retaining *CeraFlam®*. Our fire ceramic is flavour-neutral, robust, durable ceramic that is proven to be food-safe and capable of storing enormous amounts of heat. All of these qualities are essential for making a good pizza.

Pizza Stone
H 2cm | Ø 34 cm | 3 kg

SPRING WATER IN YOUR HOME

Our 3Quellen® technology brings us closer to the dream of fresh spring water within our own four walls. It enables you to activate your mains water using a natural process that requires neither an electrical current nor additives. Patented 3Quellen water activation combines three natural methods in one piece of equipment.

Mains water is swirled in the 3Quellen water activator using shaped ceramic stones. Special minerals and ceramic micro surface structures also affect the water. Our triple patented water activation is the only method of its kind in the world.

Our technology is easy to install into your water main (centralised or decentralised), maintenance-free and will work for a long period without wear. To go with our 3Quellen devices, we also supply a depth filter for drinking water purification. Most harmful substances (e.g. medication residue, hormones or heavy metals) can be absorbed by a coconut membrane that does not alter the mineral content of your drinking water.

Patented water activation

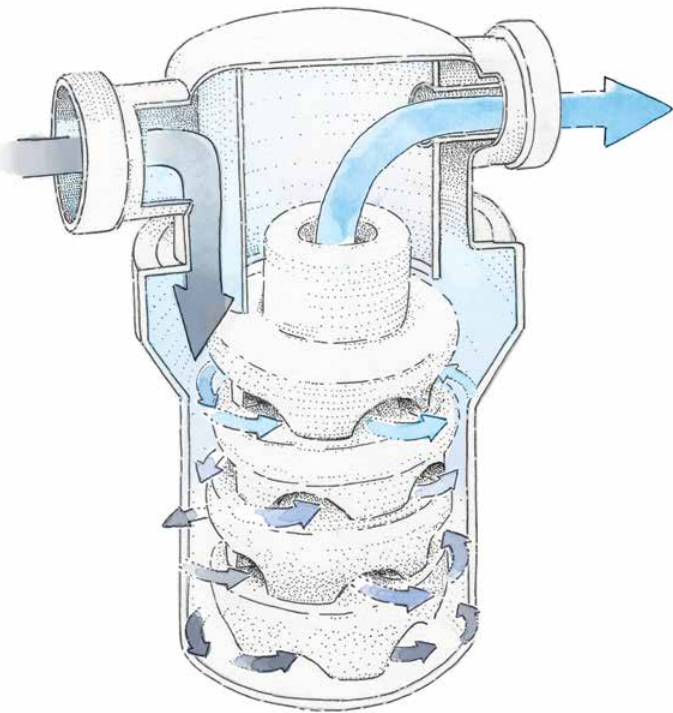

PATENTS: 102009003162, 102014100025, EP2891641

Patented 3Quellen water activation combines three natural methods:

1

Swirling

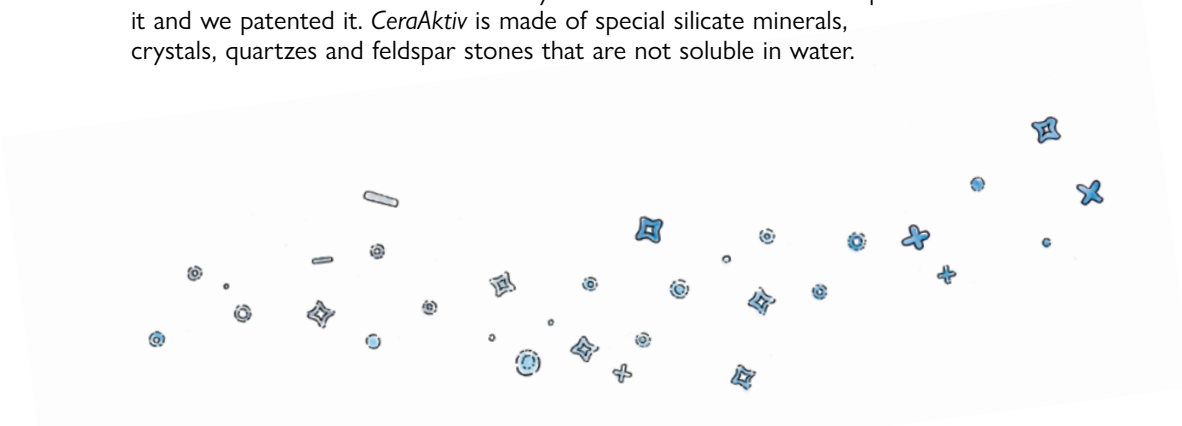

The image of the rushing waters of a mountain stream makes the principle of “activated” water in nature easier to grasp. The built-in shaped ceramic stones create a vortex in the patented 3Quellen device. This dynamizes and activates the water.

2

Changes in charging properties

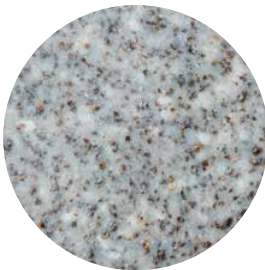

The charging properties of water change upon contact with silicate surfaces, which is why we make the shaped ceramic stones from CeraAktiv® ceramic. The ceramic is only available from us. We developed it and we patented it. CeraAktiv is made of special silicate minerals, crystals, quartzes and feldspar stones that are not soluble in water.

3

Surface maximisation

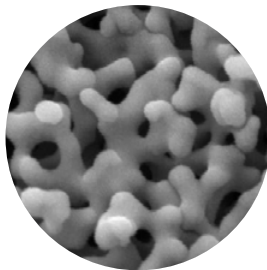

The shaped ceramic stones are produced with our patented Porosium® surface, which makes it possible to create up to 100m² of surface area for every gram of ceramic, achieving the tiniest structures and maximising the active surface. This boosts turbulence and the effect of contact.

1:200

1:1.000.000

3QUELLEN MODEL S

Decentralised connection to the drinking water point (e.g. kitchen angle valve)

- Patented water activation with CeraActiv® ceramic activation cascade
- For self-assembly in any installation position. Ready for installation with connection set

Made of white polypropylene

H 12.5 cm, W 13 cm, L 7 cm, 0.4 kg

Operating pressure: min. 2 bar – max. 6 bar

Water temperature: 5 – 23 °C

Capacity: unlimited

Volumetric flow rate: max. 5 l/min*

no filtration

Use: drinking water

Connection: 3/8 inch external thread

Pressure reduction: approx. 0.1 bar*

*Values indicated depend on local water pressure.

3QUELLEN MODEL M

For houses with up to 2 accommodation units

- Patented water activation with CeraActiv® ceramic double activation cascade and pulsator disc
- Centralised connection to the mains water supply
- The device is maintenance-free and will function for a long period without wear
- Installation by a specialist required

Component testing: DVGW reg. no NW 9301CQ0351

H 31 cm, W 22.5 cm, L 13.5 cm, 3.4 kg

Operating pressure: min. 2 bar – max. 6 bar

Water temperature: 5 – 23 °C

Capacity: unlimited

Volumetric flow rate: max. 1.5 m3/h*

no filtration

Use: drinking water

Connection: R 1 inch external thread

Pressure reduction: approx. 0.2 bar*

3QUELLEN MODEL L

For houses with up to 6 accommodation units

- Patented water activation with 5 source stones made of CeraActiv® ceramic
- Centralised connection to the mains water supply
- The device is maintenance-free and will function for a long period without wear
- Installation by a specialist in any installation position

Component testing in accordance with the Pressure Equipment Directive 2014/68/EU

W 22 cm, H 30.5 cm, L 25 cm, 12 kg

Operating pressure: min. 2 bar – max. 8 bar

Water temperature: 5 – 20 °C

Capacity: unlimited

Volumetric flow rate: max. 5 m3/h*

no filtration

Use: drinking water

Connection: R 1 inch internal thread

Pressure reduction: approx. 0.2 bar*

WIV® MINI FILTER

Decentralised connection to the drinking water point (e.g. kitchen angle valve)

- Filter with coconut membrane
- Most harmful substances (e.g. medication residue, hormones, heavy metals) can be absorbed
- The mineral content of the drinking water is not altered
- Ideal for combining with 3Quellen® water activation
- For self-assembly in any installation position. Ready for installation with connection set

Component testing: WRAS valid until 4 / 2023

H 29 cm, W 10 cm, L 10 cm, 0.8 kg

Operating pressure: min. 3 bar – max. 6 bar

Water temperature: 5 – 23 °C

Capacity: approx. 5,000 l* / max. 12 months

Volumetric flow rate: max. 5 l/min* (new cartridge)

Use: drinking water

Manufacturer: BBB Gebäudetechnik GmbH

Connection: 3/8 inch external thread

Pressure reduction: approx. 0.3 bar*

LIVING

LUXOR

SCENT TREASURE

SCENT ROSE

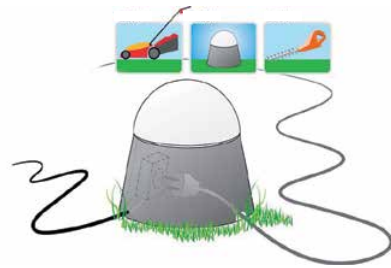

FIRELIGHTER

LUXOR

The multi-functional light with power point

The *Luxor* is a portable garden light with 5m connecting cable and a sturdy and non-dazzling opal glass dome. A high-quality socket for unobtrusive power supply has also been incorporated into the base. It is easy to connect *Luxor* to *Luxor* and flexibly illuminate your house and garden at any time. It means you always have a nearby source of electrical power, e.g. for an electric lawn mower, hedge trimmers or christmas lights.

E27 screw-fitting light bulbs up to a maximum of 60 watts can be used. The output of the integrated socket amounts to a maximum of 3,500 watts. *Luxor* can also be used indoors.

Luxor
Ø 26.5 cm | H 27 cm | 8.2 kg

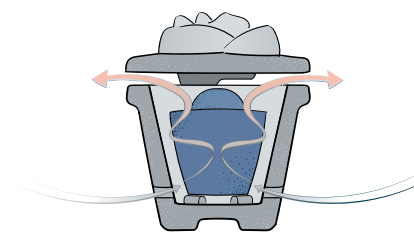

SCENT TREASURE

Experience fragrance in a whole new way!

The patented *Granicium® Scent Treasure* is a three-stage adjustable diffuser for all kinds of liquid fragrances. Its washable fragrance reservoir absorbs oils, essences or perfumes and diffuses them into the air over a long period.

You can put the *Scent Treasure* anywhere in your home. As well as aromatic oils, you can also use perfumes or room fragrances in the *Scent Treasure*. We supply a range of high-quality, pure and natural essential oils (see p. 31).

Scent Treasure
3-piece | Ø 10.5 cm | H 12 cm | 0.8 kg

SCENT ROSE

Enjoy fragrances decoratively

The Scent Rose is made of porous special porcelain. This self-developed material guarantees an optimal scent absorption and storage. The rose relief is both decorative and functional. The surface is greatly enlarged by the shape. The result is a long-lasting scent effect.

Any fragrance can be dripped onto the porous porcelain to release its aromas over a long period of time. These can be aromatic oils, perfumes or other liquid fragrance essences. Depending on the size of the room and the desired fragrance intensity, just a few drops of aroma oil are sufficient.

We supply a range of high-quality, pure and natural essential oils (see p. 31).

FIRELIGHTER

Light fires with vegetable oil or leftover candles

You can safely and cleanly stack large pieces of firewood with the *CeraFlam® Firelighter*. The large, curved fire groove allows the initial flame to come into contact with the entire width of the wood. This immediately creates a high temperature and a flue draught. Particulates and odour are reduced.

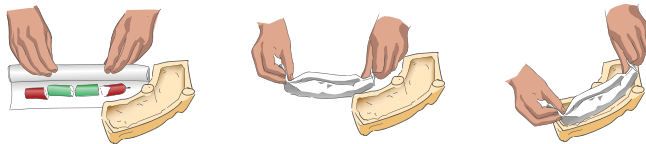

The wood catches fire very quickly. While the fire is lit, the *Firelighter* remains in the embers where it also stores thermal energy, increasing the energy efficiency of the fireplace. Once it has cooled down, the *Firelighter* can be removed and reused. No cleaning is necessary.

You can use vegetable oil and leftover candles as fuel in the *Firelighter*. These energy sources are cheap, ecological and found in every household. You will love how safe and easy lighting your fire can be.

BIRD BATH

Granicium®

An attraction that will bring a variety of birds to your garden. Your feathered friends can enjoy a refreshing bath, or quench their thirst from the edge, as well as from the central island. The material is rough enough to offer secure footing for every bird.

A suitable site for the bath can be found in any garden – on lawns, gravel, walls or terraces. Your visitors will appreciate the cool liquid, which should ideally be topped up every day. The *Bird Bath* can even be used in winter when birds desperately need water. As it is frost-proof, it will not be affected by ice.

The *Bird Bath* can be raised off the ground using the optionally available stainless steel stand. This keeps birds safe from cats and makes them even easier to observe. The *Bird Bath* is made from *Granicium*. It is unglazed and natural, totally frost-resistant and weatherproof.

Bird Bath
Ø 38 cm | H 6.5 cm | 5 kg

Bird Bath with stainless steel stand
Ø 38 cm | H with stand 55 cm | 7 kg

BIRD TABLE

Granicium®

The patented *Bird Table* is a species-appropriate bird feeder that birds can fly into from all sides. Its transparent structure makes the *Bird Table* ideal for birdwatching – a fascinating way to pass the time. At the same time, the open structure makes birds feel safe.

The frame has an option for hanging up fat balls, as well as scattering feed, so you can satisfy the dietary requirements of most songbirds. The *Bird Table* has a three-part structure made from ceramic and a rust-proof, stainless steel frame. The pieces are easy to put together. They are so secure that the *Bird Table* can even withstand storms.

A rust-proof, stainless steel stand is available to go with the *Bird Table*. The stand keeps birds safe from cats and makes them even easier to observe. The stand is the same for our *Bird Bath*.

💡 Bird-feeding info

If you use suitable food, you can feed and observe birds all year round. However, you should cut right down on feeding in the summer so as not to influence natural behaviour.

AROUND

Granicium®

Around is designed as a bird table or bird bath for hanging on your balcony, terrace or even in a tree. A hanging bird table or bath keeps birds safe from cats and makes them easier to observe. The ceramic shell for use as a bird bath is sealed. The shell for use as a bird table has two holes for drainage.

We developed *Around* in collaboration with Italian designer and bird expert, Luca Galmarini.

The rough *Granicium*® surface gives birds security. The high-quality ceramic is frost-proof, UV-resistant and sea water-resistant.

Due to the decrease in natural food sources, some ornithologists now recommend feeding the birds all year round.

Around
Ø 28.5cm | H 65cm | 5 kg

FEEDING ROOF

CeraNatur®

The *Feeding Roof* is used as a holder for bird feed dumplings. It looks attractive when hung by its high quality brass chain on branches or in bushes. The feeding roof provides shelter from rain and keeps the food dry and mould-free. You will be delighted when the *Feeding Roof* becomes the focal point for your garden birds.

Feeding Roof

Ø 14.5 cm | H 20 cm (with chain) | 0.3 kg

NESTING HOLE

CeraNatur®

Although the wren is the second smallest bird in Europe, its voice would put even Caruso in the shade. The powerful song of the male starts early in the morning and only quietens down late in the evening. To keep their energy levels high, wrens eat plenty of insects. Wrens build their nests close to the ground in hedges and bushes.

The *Nesting Hole* can simply be hung on the rope supplied, without damaging trees or bushes. The roof and the rope are attached to the body. This makes the *Nesting Hole* safe from predators. To clean, pull the roof upwards and then simply wash out the nesting hole.

Wrens will also use this hole as somewhere to shelter during the winter. It's also suitable for tits, depending on the hanging height.

Nesting Hole for wrens and tits
Ø hole 2.8cm | H 18cm | D 14cm | 2kg

INSECT STATION

Granicium®

Bees, bumble-bees, butterflies, wild bees and even wasps are crucial for plant pollination and for preserving the balance of nature. Numbers of flying insects have fallen because their natural food sources are becoming more scarce.

Our patented *Insect Station* is a drinking and feeding station in one. Flying insects are attracted by the blue paint. The sponge included can be soaked in syrup as a nectar substitute and placed in the middle. Solid food (e.g. pieces of fruit) can be placed on the inside edge. The water channel that runs all the way around the feeder acts as a watering place and also protects the food from ants.

Gardeners will be rewarded if they place the *Insect Station* approx. 4 m from their garden furniture. Wasps and bees will much prefer to have a rest at the Insect Station, leaving you in peace to enjoy your coffee in the garden.

The *Insect Station* is also available as a set with a stand.

Insect Station
Ø 30 cm | H 3.5 cm | 1.9 kg

WILD BEE HOUSE

CeraNatur®

There are nearly 2,000 species of wild bee in Europe and around 9% of them are facing extinction. You can make an important contribution to preserving these species with the *Wild Bee House*.

The CeraNatur® *Wild Bee House* has a recess on the back for easy mounting onto trees, buildings or pergolas. It is woodpecker-proof and suitable for the most common solitary insects:

Masked bees, solitary wasps and mason bees: 2-4 mm
Scissor bees: 3-5 mm
Rust-red mason bees; leaf-cutter bees: 5-7 mm
European orchard bees: 6-9 mm

Wild Bee House
L 18cm | W 11.5cm | D 6.5cm | 1.8kg

💡 Bee info

Wild bees are essential for pollination. Unfortunately, their numbers have sharply declined in recent years, so species-appropriate nesting aids are extremely important.

FLOWER WILD BEE HOUSE

CeraNatur®

The *Wild Bee Flower* is made of durable CeraNatur® ceramic and has more than 48 woodpecker-proof nesting tubes of different diameters, for the most common solitary insects.

It comes with a rope for hanging on trees, fences or posts, etc. It does not need to be protected from rain. Please make sure that the insects have a clear approach and that the *Wild Bee Flower* is not covered by leaves hanging close by.

Flower Wild Bee House
Ø 18 cm | H 9 cm | 3.5 kg

BUMBLE-BEE CASTLE

Granicium®

The *Bumble-bee Castle* has been made with bumble-bees' needs in mind. Its two-piece structure with insulating bottom panel is made entirely from ceramic and is frost-proof and stable. The entrance is painted blue to encourage bumble-bees to come inside. Bumble-bees start to hibernate in the *Bumble-bee Castle* in the autumn and build their nests in it in spring.

The *Bumble-bee Castle* helps bumble-bees to become established in the garden and it is also a very attractive decoration.

A ceramic access tube has been integrated into the inside to protect against wax moths.

Bumble-bee Castle Granicium®
Ø 27 cm | H 16 cm | 5.5 kg

💡 Bumble-bee info

Bumble-bees are hardworking garden helpers. Unlike honey-bees, they also fly on cool and wet days, so they make sure that plants and flowers are pollinated.

EARWIG HOUSE

CeraNatur®

The earwig is a useful and harmless insect. They love to eat harmful greenfly that can cause large amounts of damage to fruit and flowers. Earwigs are useful to people as an organic form of pest control. Earwigs are nocturnal and return to their earwig house to sleep during the day.

The *Earwig House* will be occupied between the end of April and the end of October. The *Earwig House* should be placed in a shady location, as close to the ground as possible, over a branch or a stick. The earwigs will soon get to work.

Earwig House

Ø 3cm | H 12cm | 300g | set with 3 pieces

Earwig info

Earwigs are useful to people as an organic form of pest control. They love to eat harmful greenfly that can cause large amounts of damage to fruit and flowers.

HEDGEHOG HOUSES

CeraNatur®

The CeraNatur® hedgehog houses are frost-proof and provide protection all year round. Hedgehogs are not only cute, but an important pest-control expert. Hedgehogs will remain in the same territory if conditions are right. They prefer a dry, safe home that cannot be sniffed out by dogs.

Dig the hedgehog houses down into the earth a little, make a bed of leaves inside and cover it with grass, bark and leaves. The hedgehog houses protect hedgehogs in hot summers and cold winters.

Hedgehog Snail-Shell
Ø 35 cm | H 16 cm | 4.5 kg

💡 **Hedgehog info**

The hedgehog is protected all year round. It is nocturnal and feeds on insects, larvae and molluscs. During hibernation, hedgehogs can live up to half a year without food.

MINKA'S TILED STOVE

The electric heated cat bed

Minka was the name of our workshop cat. Because she always liked to make herself comfortable on the radiator, we made her her own little tiled stove. Cat lovers and breeders have been using *Minka's Tiled Stove* for many years now. Our customers are delighted with the positive effect on their pets.

Minka's Tiled Stove is made from *CeraNatur®* ceramic and heated electrically. The self-regulating heating element has an economic output of 10 watts and heats up the *Tiled Stove* to a constant 48°C. Electricity costs amount to around 5 Euro cents / 24 hours. *Minka's Tiled Stove* is TÜV tested. It also comes with a straw-filled cushion.

Minka's Tiled Stove
W 44cm | H 7cm | D 33cm | 6.1 kg

CeraNatur®

Sandstone-coloured clay forms the basis for our natural ceramics. This clay is a geological anomaly that is only found in Coburg, in a thin layer of earth. We fire *CeraNatur*® at a high temperature to make it robust and frost-proof. Its naturally shimmering brown tones and velvety-soft surface never fail to delight us.

Properties

CeraNatur® is a wonderful material, with many different uses in the home and garden. In addition to its outstanding material properties, it has a wonderfully natural appearance that is unique among ceramics.

frost-proof

robust &
durable

waterproof

acid &
sud-resistant

CeraLava®

Lava sand combined with special clays from the Westerwald creates an almost black ceramic. It is a rarity and that is exactly why we like it so much. *CeraLava*® is as robust as it is frost-proof. Despite its monochrome surface, this special ceramic exudes warmth and depth.

Properties

With its quiet power, *CeraLava*® is a wonderful backdrop for light and fire. It gives our Waxburners and Luxor lights even more expression, without any of the restrictions posed by material properties.

Granicium®

Granite is a particularly hard, mineral rock with a high quartz and feldspar content. Granite was formed from hardened magma over two kilometres deep, more than ten million years ago. Granite is characterised by its crystalline structure, high density and immense robustness and we wanted these qualities for our ceramics.

Properties

Granicium® is characterised by the properties of its raw material, granite. The high quartz and feldspar content makes the material especially robust and durable. The fine, crystalline composition makes various uses possible and creates a pleasantly non-slip surface.

frost-proof

heatretaining

CeraFlam®

We use *CeraFlam*® in products that need heatretaining and fireproof qualities. A similar composition to the material we have developed was used in American space shuttles for heat insulation. This type of ceramic is very rare and difficult to work with.

Properties

There is probably no other ceramic material with such exceptional qualities. Unlike normal ceramic, *CeraFlam*® is totally fireproof and can absorb and store three times more heat than steel. It is not susceptible to aging.

As a craft business, what matters most to us are people and the natural material, ceramic. Our pieces intentionally show signs of being handmade and the beauty of ceramic. Behind every piece that leaves our workshop is the skill and passion of our staff. The best products can only be made by exceptionally well-trained and motivated staff.

We want to give trained eyes and sensitive souls long-lasting enjoyment with our authentic design that does justice to the material. Our products should convey quality and beauty. DENK has won numerous national and international design prizes and diplomas.

You will only find products of the type and function of many of our creations at DENK. Our developments and innovations are protected by numerous national and international patents, trade marks and other protective rights. This protects our customers and secures jobs in Germany.

Our registered trade marks are:
